Madison- State Representative Janel Brandtjen (R- Menomonee Falls) issued the following statement regarding Congressman Sensenbrenner's legislation prohibiting the use of fetal tissue for research purposes. The legislation would however allow fetal tissue to be used if it is obtained from a stillbirth or ectopic pregnancy.

"This legislation is a perfect common sense bill. It is absolutely unthinkable that we would deny a baby his or her life because researchers believe fetal tissue can be useful in the laboratory. This bill allows for the research to continue without the horrors associated with abortion."
