Statement on Assembly Democrats' 23 Job-Killing Amendments

Senator Wanggaard issued the following statement after viewing the 23 amendments introduced by Assembly Democrats in advance of the first committee vote for the Foxconn incentive bill:

“What are they thinking? I guess the Democrats are either unwilling or unable to learn how to bring jobs to Wisconsin rather than force them away. They just don't get it. They are recycling the same ideas and mandates that cost Wisconsin 133,000 jobs during Jim Doyle's second term. The amendments read like a wish list for their political supporters.

Make no mistake – the Democrats are trying to kill the Foxconn project with these amendments and every job it will create. It doesn't make any sense.”
