Statement on Governor Evers' Budget by Steve Breitlow,
Business Manager, Plumbers Local 75

Plumbers Local Union 75 applauds Governor Tony Evers for introducing a budget that embraces hard work and stands up for Wisconsin's history as a state that respects its workers, values skills and training, and delivers results for taxpayers.

Over the last few years, policy changes that undermine worker training, workplace safety, hard earned family supporting wages, and a strong stable construction industry have plagued our state. The solutions put forward by Governor Evers protects Wisconsin jobs and will reestablish Wisconsin as a leader in worker training, worker efficiency, and once again ensure that taxpayer funded projects are delivered on time and on budget by highly qualified Wisconsin workers.

We thank Governor Evers for his willingness to make the tough choices to move Wisconsin forward on infrastructure funding, restoring local control, and prioritizing Wisconsin's workers and families.
