## **Cities & Villages Applaud Governor Evers Veto of New Quarry Siting Policy Safeguarding the Voice & Participation of Local Citizens**

### *DCCVA Statement on Statement on the Budget*

*On behalf of the DCCVA, we wish to extend our appreciation to Governor Evers for his veto of the quarry local zoning preemption provision inserted in the state budget.*

*Controversial quarry regulatory policy should not be inserted into a state budget, especially when the proposal intends to limit the voice and authority of our local residents and local elected officials.*

*This is an issue that at the least deserves full public hearings and debate.*

*Quarries, residential homeowners and commercial property owners in more cities and villages may in certain circumstances peacefully co-exist, but there needs to be a balance that includes the voices of the local residents and other local businesses.*
