## **STATEMENT ON EMERGENCY ORDER 36**

“I’m glad Governor Evers and Secretary-Designee Palm have turned the dial a little on the vise they are using to strangle Wisconsin’s economy. But this limited, overdue release of the government’s iron grip on Wisconsin employees and business continues to show the error of Evers’ one-size-fits-all approach to the pandemic from day one.

“For the 36<sup>th</sup> time, Governor Evers is crushing huge areas of the state where coronavirus isn’t overwhelming anything, including hospitals. There are regions of the state have had so few or sporadic cases of coronavirus that determining a trend line is statistically impossible. It’s past time to open those regions up. If the Governor doesn’t believe people are traveling to those areas already, he needs to get out of Madison.”
