Covid-19 Test Statement

KENOSHA – Today Representative Tod Ohnstad (D–Kenosha) provided the following statement on a recent Covid-19 test.

“This message is to share that I have tested positive for Covid-19. While I have had only mild symptoms, I am adhering to all medical guidance and will continue to be appropriately quarantined. It is unclear when or where I had come into contact, but we know community spread continues.

As I have said throughout the year, we must all take this virus seriously. Vaccines have been developed, but we must all remain vigilant until they are widely available and distributed. I have worked to diligently follow the guidelines, but if I can get a positive test, you could too. Wear a mask, distance appropriately, wash regularly, stay home if you can, and when in doubt, go and get tested.”
